PROFILE

Customer-facing Technical Consultant at Okta specializing in Auth0 Customer Identity Cloud, and a subject matter expert on Auth0 for AI Agents, the emerging identity patterns secure agentic workflows demand. Five years of hands-on Auth0 and Okta experience across financial, healthcare, and SaaS environments, with end-to-end ownership of CIAM and workforce IAM platforms and a track record of complex identity migrations at scale. Strong in OAuth 2.0, OIDC, SAML, SCIM, and modern auth (Passkeys, FAPI 2.0, DPoP), with development across Auth0 Actions and Hooks and Okta Inline Hooks and Workflows, all delivered through CI/CD pipelines aligned with Zero Trust.

TECHNICAL SKILLS

IAM Platforms & Customer Identity: Okta Workforce Identity, Okta Customer Identity Cloud, Auth0, Auth0 for AI Agents, SailPoint IdentityIQ, CyberArk, Azure Active Directory, Active Directory, CA SiteMinder (legacy)

Identity Protocols & Standards: OAuth 2.0, OpenID Connect (OIDC), SAML 2.0, SCIM, FAPI 2.0, DPoP, PKCE, JWT, LDAP, TLS, PKI fundamentals

Authentication, CIAM & Access Control: SSO, MFA, Adaptive Authentication, Passkeys, WebAuthn, FIDO2, Conditional Access, RBAC, ABAC, Privileged Access Management, Identity Threat Detection and Response (ITDR), Zero Trust Architecture

IAM Engineering & Extensibility: JavaScript, Auth0 Actions, Auth0 Rules, Auth0 Hooks, Okta Inline Hooks, Okta Workflows, Auth0 SDKs, REST APIs, Postman, token vaulting and scoped delegation patterns for AI agents

DevOps, IaC & Observability: Terraform, GitHub, Jenkins, CI/CD pipelines for IAM configuration, Splunk, Dynatrace, New Relic

Consulting & Compliance: Customer onboarding, consultation, technical pre-sales, workshop facilitation, identity platform migrations, NIST 800-53, SOC 2, ISO 27001, PCI DSS, SOX, GLBA, GDPR, HIPAA

PROFESSIONAL EXPERIENCE

Okta **Feb 2026 – Present**
Charlotte, NC · Remote
Technical Consultant

- Partner with customers to implement and optimize Auth0 Customer Identity Cloud across web, mobile, SPA, and API workloads. Lead consultation, deployment planning, and onboarding workshops covering Universal Login, Organizations, Actions, MFA, Passkeys, Attack Protection, and social/enterprise IdP integrations.
- Subject matter expert for Auth0 for AI Agents, advising customers on secure identity patterns, including token vaulting, scoped delegation, machine-to-machine authentication, and consent flows for emerging AI and agentic workflows.
- Lead complex Auth0 migration engagements, including a 300M+ user migration from public to private cloud, with phased cutover, data integrity validation, and zero unplanned downtime to user-facing login and MFA flows.
- Drive customer migrations from legacy and incumbent identity providers to Auth0, covering attribute and claim mapping, application re-onboarding, password and MFA factor migration, and coexistence patterns during cutover.
- Advise on authentication and authorization patterns using OAuth 2.0, OIDC, and SAML. Troubleshoot tenant configuration, login flows, token behavior, extensibility, and federation issues to unblock customer go-lives.
- Develop reusable reference implementations and migration playbooks that compress customer onboarding and standardize delivery across the consulting organization.

Fifth Third Bank contractor via CBTS **Jun 2024 – Dec 2025**
Charlotte, NC · Remote
Security Engineer II – Identity and Access Management (CIAM)

- Set up and owned the Auth0 tenant in production for the Newline commercial banking platform, running customer identity flows for external customers and internal staff aligned to Zero Trust and the bank's internal security standards.
- Architected and led planning for the migration of the Newline CIAM stack from Auth0 to a target identity platform, covering feature and gap analysis, attribute and claim mapping, directory schema design, user profile migration strategy, and application re-onboarding sequencing.
- Designed and operated SSO and MFA journeys using OAuth 2.0, OIDC, and SAML, with adaptive MFA and step-up auth tuned to commercial banking risk patterns. Built Auth0 Actions, Rules, and Hooks in JavaScript and REST APIs for token enrichment, registration, credential recovery, and integrations with internal risk services.
- Implemented CI/CD for identity configuration using GitHub, Jenkins, and Terraform. Monitored authentication health through Splunk and Dynatrace, reducing CIAM-related incidents and audit findings.

Cardinal Health consultant via Tata Consultancy Services **Jul 2020 – Aug 2022**
Kolkata, India · Remote
IAM Systems Engineer

- Served as Okta SME and IAM platform engineer for a global healthcare workforce of 22,000+ identities. Designed SSO patterns with SAML 2.0, OIDC, and OAuth 2.0 across on-prem and cloud applications.
- Led the migration of the enterprise identity stack from CA SiteMinder to Okta, directing 8 engineers to federate 100+ B2E, B2B, and B2C applications with Active Directory and Okta, aligning delivery with SOC 2, ISO 27001, and HIPAA.
- Operated SailPoint IdentityIQ for account aggregation, connector configuration, and joiner, mover, leaver workflows. Partnered with CyberArk teams on privileged access patterns, reducing orphaned admin access. Deployed and tuned MFA and adaptive MFA policies across legacy and cloud platforms.

EDUCATION

Clemson University **Aug 2022 – May 2024**
Clemson, SC
M.S., Computer Science

Institute of Engineering and Management **Apr 2016 – Jul 2020**
Kolkata, India
B.Tech., Computer Science and Engineering

CERTIFICATIONS

- Auth0 Certified Developer
- AWS Cloud Technology Consultant Specialization
